Evidence Based Medicine		

Text **and** Text-based **Search**

What is a database?

A database is a collection of **information** that is organized so that it can easily be accessed, managed, and updated. In one view, databases can be classified according to types of content:

- *bibliographic*
- full-text
- Numeric
- Images

In text retrieval, **full-text search** refers to techniques for searching a single computer-stored document or a collection in a **full-text database**.

What is a full-text search?

In a full-text search, the **search engine** examines all of the words in every stored document as it tries to match search criteria (text specified by a user).

The deficiencies of free text searching have been addressed in two ways:

- - By providing users with tools that enable them to express their search questions more precisely
- - By developing new search algorithms that improve retrieval precision.

ترفندهای جستجو در وب

توجه: این ترفندها در بسیاری از موتورهای کاوش مورد استفاده قرار می گیرد.

جستجوی عبارتی

- علامت "": برای جستجوی عین عبارت

ترفندهای جستجو در وب

نادیده گرفتن کلمات

علامت - : برای نادیده گرفتن برخی از کلمات در جستجوها از این علامت استفاده می شود. (رعایت فاصله)

لحاظ کردن کلمات

علامت + : برای انجام جستجوهای است که تمامی واژه ها را در برداشته باشد.

ترفندهای جستجو در وب

سایر شکل‌های کلمه

علامت * : برای یافتن سایر شکلهای یک واژه *iran
و برای اینکه برخی کلمات را که نمی دانید جستجو کنید مثلاً

iran * religion

ترفندهای جستجو در وب

نوع خاصی از مدارک:

filetype: اگر به دنبال نوع خاصی از مدارک هستیم بعد از کلمات جستجو این عبارت را نوشته و نوع را مشخص می کنیم.

ترفندهای جستجو در وب

جستجوی اطلاعات در سایتی خاص:

site: : اگر منابع اطلاعاتی خود را فقط از یک سایت خاص بخواهیم بعد از عبارت جستجو کلمه سایت و سپس آدرس آن را قرار می دهیم.

ترفندهای جستجو در وب

بازه عددی (سال و قیمت)

- 1940..1950: برای اینکه جستجوی خود را در بازه عددی خاصی محدود کنیم.
مثل Sony TV \$300..\$500

تعریف واژه:

- define: اگر به معنی کلمه ای نیاز دارید قبل از آن این واژه را استفاده نمایید.

ترفندهای جستجو در وب

کلیدواژه / کلید واژه ها در عنوان

Intitle یا allintitle

ترفندهای جستجو در وب

عملگرهای بولی Boolean Operators

AND : برای محدود کردن جستجو

Iran + history

OR : برای بسط جستجو

iran OR iran's OR Iranian OR Persian OR persian's

NOT: برای محدود کردن (استثنا کردن)

Persia –iran –persian

Boolean search and Syntax

Boolean Search uses logical operators, named **Boolean operators**, to combine the elements of a single search.

Boolean Operators used in Entrez are:

- **AND**: To AND two search terms together instructs Entrez to find all documents that contain BOTH terms.
- **OR**: To OR two search terms together instructs Entrez to find all documents that contain EITHER term.
- **NOT**: To NOT two search terms together instructs Entrez to find all documents that contain search term 1 BUT NOT search term 2.

PubMed is a free resource supporting the search and retrieval of biomedical and life sciences literature with the aim of improving health—both globally and personally.

The PubMed database contains more than 34 million citations and abstracts of biomedical literature. It does not include full text journal articles; however, links to the full text are often present when available from other sources, such as the publisher's website or [PubMed Central \(PMC\)](#).

پایگاه داده پابمد توسط موسسه مرکز ملی اطلاعات بیوتکنولوژی
و NCBI=National Center for Biotechnology Information
کتابخانه ملی پزشکی آمریکا (NLM) گردآوری و نمایه می شود.

PubMed comprises more than 22 million citations for biomedical literature, life science journals, and online books. Citations may include links to full-text content from PubMed Central and publisher web sites.

PubMed Central

- PubMed Central (PMC) is a digital archive of life sciences journal literature, developed and managed by the NCBI.
- The value of PMC lies in getting more rapid searching, manipulation, and cross-linking of the complete collection.
- A list of PMC Journals is included in the Manual.

- آرشیو دیجیتال کتابخانه ملی پزشکی آمریکا
- از سال ۲۰۰۰ میلادی ایجاد شد.
- محیطی رایگان برای دسترسی به متن کامل مقالات انگلیسی زبان
- 450 life sciences journals
- over 500,000 articles, letters, etc.
- 700,000 unique users monthly

معرفی پایگاه Scopus

معرفی پایگاه Scopus

Scopus بزرگترین بانک استنادی و چکیده نویسی جهان است که توسط Elsevier ناشر هلندی در نوامبر ۲۰۰۴ راه اندازی شد و رقیب اصلی ISI امریکا می باشد.

❖ ۶۹ میلیون رکورد (۴۸/۸ میلیون چکیده)

❖ حدود ۲۲۸۰۰ عنوان از بیش از ۵۰۰۰ ناشر در سراسر جهان

❖ بیش از ۸ میلیون مقاله کنفرانس

❖ بیش از ۱۵۰ هزار کتاب که سالانه ۲۰ هزار عنوان اضافه می گردد.

❖ بیش از ۳۹ میلیون پروانه ثبت اختراع

Author search

Compare sources >

To determine which author names should be grouped together under a single identifier number, the Scopus Author Identifier uses an algorithm that matches author names based on their affiliation, address, subject area, source title, dates of publication, citations, and co-authors. Documents with insufficient data may not be matched, this can lead to more than one entry in the results list for the same author. By default, only details pages matched to more than one document in Scopus are shown in search results. [About Scopus Author Identifier](#)

This author's *h*-index is 11

The *h*-index is based upon the number of documents and number of citations.

Note: Scopus is in progress of updating pre-1996 cited references going back to 1970. The *h*-index might increase over time.

Patent Search

What is a patent?

A patent is, in fact, a bargain between the Government and the patentee.

- It serves to encourage new inventions and allows the patentee to benefit from the commercial exploitation of the invention.
- In return, the patentee provides full disclosure of the invention so that the public have access to the information and benefit from such disclosures.
- **Such information is invaluable for research and development and can be used by others in developing their own products.**

What is Patentable?

Generally, a patentable invention:

- (a) must be novel;
- (b) must involve an inventive step (non-obviousness);
- (c) must be capable of industrial application;
- (d) must be clearly written.

➤ These criteria make patents a major sources of information.

ماده ۴ - موارد زیر از حیطه حمایت از اختراع خارج است:

الف - کشفیات، نظریه‌های علمی، روشهای ریاضی و آثار هنری.

ب - طرحها و قواعد یا روشهای انجام کار تجاری و سایر فعالیتهای ذهنی و اجتماعی.

ج - روشهای تشخیص و معالجه بیماریهای انسان یا حیوان.

این بند شامل فرآورده‌های منطبق با تعریف اختراع و مورد استفاده در روشهای مزبور نمی‌شود.

د - منابع ژنتیک و اجزاء ژنتیک تشکیل دهنده آنها و همچنین فرایندهای بیولوژیک تولید آنها.

ه - آنچه قبلاً در فنون و صنایع پیش‌بینی شده باشد.

فن یا صنعت قبلی عبارت است از هر چیزی که در نقطه‌ای از جهان از طریق انتشار کتبی یا شفاهی یا از طریق استفاده

عملی و یا هر طریق دیگر، قبل از تقاضا و یا در موارد حق تقدم ناشی از اظهارنامه ثبت اختراع، افشاء شده باشد.

در صورتی که افشاء اختراع ظرف مدت شش ماه قبل از تاریخ تقاضا یا در موارد مقتضی قبل از تاریخ حق تقدم اختراع

صورت گرفته باشد، مانع ثبت نخواهد بود.

و - اختراعاتی که بهره‌برداری از آنها خلاف موازین شرعی یا نظم عمومی و اخلاق حسنه باشد.

و - اختراعاتی که بهره‌برداری از آنها خلاف موازین شرعی و نحوه تعلق حق اختراع ثبت شده به شرح زیر است:

ماده ۵ - چگونگی ذکر نام مخترع در گواهینامه اختراع و نحوه تعلق حق اختراع ثبت شده به شرح زیر است:

Each patent has three main sections:

1. a cover page which presents bibliographic information,
2. a specification, which describes the invention,
3. claims, which define the scope of activity from which the patentee has the right to exclude others unless they sign licensing agreements.
